

Content Approval Workflow

Content Approval Workflow

Revital Productions — Internal Use Only | Updated June 2026

PURPOSE: This document defines the complete content approval workflow for all deliverable types at Revital Productions — from production to formal client sign-off. Every deliverable must follow this workflow without exception. No content may be published, launched, or submitted to a client without a completed and logged approval.

KEY RULE: A verbal "looks good" or a text message saying "approved" is NOT a valid approval. Every deliverable requires a completed **Content Approval Form** before it is considered officially approved. This protects Revital Productions from disputes, unauthorized changes, and scope creep.

SECTION 1 — HOW THE APPROVAL WORKFLOW WORKS

The Approval Pipeline

Every deliverable at Revital Productions moves through this pipeline before it reaches the client — and must be formally approved before it is published or launched:

How Approval Forms Are Sent

1. When a deliverable moves to **Client Review** status in ClickUp, the account manager shares the deliverable with the client via the agreed delivery method (client portal, Google Drive link, or email)
2. The account manager attaches or links the relevant **Content Approval Form** (from this doc) to the delivery notification
3. The client reviews the deliverable and completes the approval form
4. The account manager logs the completed approval in ClickUp (see Section 7)
5. Only after the approval is logged does the task move to **Approved** status

 **Once ClickUp Business plan is active:** Clients can also submit revision feedback through the **Submit Feedback or a Revision Request** form, built directly on the  Client Feedback & Revisions list. The form

auto-creates a properly formatted task with the deliverable name, service, specific feedback, urgency, and any reference images — eliminating manual task creation and vague feedback. See the  Revision & Feedback Process SOP for the full form spec and field mapping.

Approval Turnaround Expectations

Per the **Client Communication Policy**, clients have **48 hours** to submit their approval form. If no response is received:

- At 48 hours: Send the **approval reminder** using the approved script from **Communication Policy Part B**
- At 72 hours: Follow up by phone
- At 96 hours with no response: Consult the account manager — refer to **Section 8** of this doc

Who Can Approve

Only the **authorized approver** named in the client's intake form (Section 1, Q9 — decision makers) may submit an approval form. If a different person submits the form, the account manager must confirm with the primary decision maker before moving to **Approved** status.

Revision After Approval

If a client requests changes **after** submitting an approval form, the following applies:

- Minor corrections (*e.g. typo fix, minor color adjustment*) — handle as a free correction, log in ClickUp, note it is post-approval
- Significant changes (*e.g. different concept, new copy direction, layout change*) — this constitutes a **new revision round** and counts toward the contracted revision limit or triggers a Change Order if rounds are exhausted

SECTION 2 — CONTENT APPROVAL FORM

Social Media Content

HOW TO USE: Copy this form and send it to the client alongside the content preview. The client fills it out and returns it via email or the client portal. File the completed form in the client's  Assets & Brand Files folder in ClickUp.

SECTION 7 — APPROVAL LOG

How to Record Every Approval in ClickUp

Every completed approval form must be logged in ClickUp immediately upon receipt. No deliverable moves to **Approved** status without a logged approval.

Step-by-Step Logging Process

- Receive the completed approval form** from the client via email or portal
- Save the form** — rename it using this format: **ClientName_ApprovalForm_ContentType_Date** (e.g. *AcmeWellness_ApprovalForm_IGPost_Jun15*)
- Upload the saved form** to the client's  Assets & Brand Files folder in ClickUp
- Add a comment** to the relevant ClickUp task using the standard approval log format below

5. **Change the task status** to **Approved**
6. **Proceed to publishing/launching** per the Content Production SOP

Standard Approval Log Comment Format

Add this comment to the ClickUp task immediately after receiving the completed form:

✅ CONTENT APPROVED
Approved By: [Approver Name] — [Approver Title]
Date Approved: [Date]
Approval Type: [Full Approval / Approved with Minor Corrections]
Revision Round: [X of X]
Form Filed: [Link to form in Assets & Brand Files folder]
Minor Corrections Noted: [Yes — see corrections below / No]
Corrections: [List any minor corrections if applicable]
Ready to Publish: Yes — scheduled for [date]

If Approved with Minor Corrections

- Make the minor corrections immediately — do not send back for another review unless the correction reveals a bigger issue
- Log the corrections in the task comment
- Add a second comment confirming the corrections were made: *"Minor corrections from approval form completed — [date]. Proceeding to publish."*
- File the corrected final version in 📁 Assets & Brand Files

If Revision Required

- Do NOT log as approved
- Move task status back to **Revision Requested**
- Log the revision in 💬 Client Feedback & Revisions list
- Reference the 🔗 **Revision & Feedback Process SOP** for next steps
- Track the revision round number — if this exceeds the contracted rounds, flag to account manager for a Change Order

SECTION 8 — WHAT TO DO WHEN A CLIENT WON'T APPROVE

Sometimes clients delay, go silent, or give vague responses instead of completing the approval form. Here is exactly how to handle each situation:

Scenario 1 — Client Has Not Responded in 48 Hours

1. Send the approval reminder email using the approved script from **Client Communication Policy Part B**:
"Hi [Name], just a friendly nudge — [deliverable name] is ready and waiting for your review! To keep things on schedule, we need your completed approval form by [date]."
2. Log the follow-up in the task comments

Scenario 2 — Client Has Not Responded in 72 Hours

1. Call or text the client directly
2. Reference the approval deadline from the **Client Communication Policy**
3. Log the call in the task comments and in 📞 Client Strategy Meeting Notes in ClickUp

Scenario 3 — Client Has Not Responded in 96 Hours

1. Notify the account manager immediately
2. Account manager assesses whether to:
 - Reschedule the go-live date and notify the client in writing
 - Escalate to leadership if this is a pattern
 - Move forward without formal approval only in exceptional circumstances — this requires leadership sign-off and must be documented
3. Log everything in the task comments and the client's CRM Deal record
4. Update Client Health to 🟡 Yellow if this is the second or third time delays have occurred

Scenario 4 — Client Says "Approved" Verbally or via Text

1. Reply immediately: *"Thanks so much! Could you quickly complete the approval form I sent over? It's just a quick form that helps us keep everything documented on our end. Here's the link: [form]"*
2. Do NOT move to **Approved** status until the form is submitted
3. If the client pushes back on the form, escalate to the account manager — do not waive the approval form requirement without leadership approval

Scenario 5 — Client Wants to Change Something After Approving

1. If the change is a **minor correction** — handle as a free post-approval correction, log it, note that it is post-approval
 2. If the change is **significant** — explain that the content was already approved and additional changes now constitute a new revision round
 3. If revision rounds are exhausted — prepare a Change Order per the **Change Order Process SOP** in Growth SOPs
 4. Never argue or be defensive — use the approved language from **Client Communication Policy Part B**
-

SECTION 9 — DISPUTE RESOLUTION

If a Client Claims They Didn't Approve Content

This is exactly why the approval form exists. If a client disputes that they approved content:

Step 1 — Pull the Approval Documentation

- Retrieve the signed approval form from 📁 Assets & Brand Files in ClickUp
- Pull the approval log comment from the ClickUp task
- Pull any email chain or portal messages confirming submission

Step 2 — Present the Evidence Calmly

- Do not argue — present the documentation factually and professionally
- Example: *"I completely understand your concern. Let me pull up the documentation — we have your completed approval form signed on [date] by [approver name]. I'll send that over to you right now."*

Step 3 — Escalate to Leadership

- Notify leadership immediately — do not try to resolve a content dispute independently
- Leadership will determine the appropriate response and whether any goodwill correction is warranted

Step 4 — Log Everything

- Log the dispute in the client's CRM Deal record Comments with date and description

- Update Client Health to  Red if the dispute is serious
- Reference this in the next Weekly Questionnaire review

Prevention Is Better Than Resolution

The best way to prevent disputes is to:

- Always use the correct approval form — never accept verbal approvals
- Always file the completed form immediately in ClickUp
- Always log the approval comment on the task on the same day
- Always confirm the authorized approver matches the person named in the intake form (Section 1, Q9)

Content Approval Workflow Version 1.0 | Revital Productions | June 2026
This workflow must be followed for every deliverable across all content types. No exceptions.
