

Service Delivery Standards

Service Delivery Standards

Revital Productions — Internal Use Only | Updated July 2026

PURPOSE: This document defines the minimum quality standards, turnaround times, deliverable specifications, and performance benchmarks for every service Revital Productions offers. These are not aspirational targets — they are the floor. Every deliverable must meet or exceed these standards before it reaches a client.

HOW TO USE: Reference this document when briefing, producing, reviewing, or reporting on any deliverable. These standards feed directly into the  QC Checklist — if a deliverable doesn't meet the specs below, it fails QC.
