

New Client Account Access SOP

New Client Account Access SOP

Owner: Delivery Lead
Trigger: New client onboarding — after kick-off call
Reference: Pull Section 8, 8B, and 8C of the client's completed intake form before beginning

- Key tools used in this SOP:**
- ClickUp —  Access & Logins Tracker,  Client Ad Account Tracker
 -  Access & Login Log Template doc — use this to create a log entry for every platform
 -  Client Ad Account Log Template doc — use this for all ad account records
 -  Client Communication Policy — channel guide for how to request access from clients

Pre-Access Review

Before requesting any access, review the following from the client's completed intake form:

- **Section 8, Q13** — Does the client have admin access to grant us?
 - If **No** or **Not Sure** → contact the client before proceeding — use the correct channel per the **Client Communication Policy** (email for standard, phone if urgent)
- **Section 8, Q14** — Does a previous agency or developer hold access?
 - If **Yes** → review Section 8B for platform details and recovery status before requesting access
 - Flag these platforms in the  Access & Logins Tracker with "Recovery Needed" and resolve before work begins
- **Section 8C, Q1** — How does the client prefer to share credentials?
 - Always follow their stated preference — never ask them to share passwords via email or ClickUp

Access Request Checklist

Platform	Access Type	Who Requests	Timeline	Intake Form Ref
Meta Business Manager	Admin or Partner Access	Paid Media Lead	Day 1	Section 8, Q2
Meta Ad Account	Advertiser or Admin	Paid Media Lead	Day 1	Section 8, Q2

Google Ads	Manager Account Link (MCC)	Paid Media Lead	Day 1	Section 8, Q3
Google Analytics 4	Editor Access	Delivery Lead	Day 1	Section 8, Q4
Google Search Console	Full User	SEO Lead	Day 1	Section 8, Q4
Google Tag Manager	Admin or User	Delivery Lead	Day 1	Section 8, Q4
Google Business Profile	Manager	SEO Lead	Day 1	Section 8, Q4
Instagram / Facebook Page	Editor or Admin	Content Lead	Day 2	Section 8, Q2
TikTok Business Account	Member Access	Content Lead	Day 2	Section 8, Q2
LinkedIn Company Page	Content Admin	Content Lead	Day 2	Section 8, Q2
YouTube Channel	Manager or Editor	Content Lead	Day 2	Section 8, Q2
Website / CMS	Editor or Developer Access	Web Lead	Day 3	Section 8, Q5
Domain / Hosting	Collaborator or DNS Access	Web Lead	Day 3	Section 8, Q7
Email Marketing Platform	Campaign Access	Email Lead	Day 3	Section 8, Q8
CRM	Admin Access	Account Manager	Day 3	Section 8, Q10
Canva / Design Tools	Editor or Admin	Content Lead	Day 3	Section 8, Q12
Revital Hub	Client Profile Created	Account Manager	Day 1	N/A

Logging Access

For every platform access received:

1. Open the  **Access & Login Log Template** doc in the Operations Space
2. Duplicate the log entry template and fill in all fields for this platform
3. Save under the client's name in the  Access & Logins Tracker list in ClickUp

4. For ad accounts specifically — also complete the 🚩 **Client Ad Account Log Template** and save in the 🚩 Client Ad Account Tracker list

🔒 Never log actual passwords in ClickUp. Log the password manager location only (e.g. "LastPass vault — Acme Wellness — Meta Business Manager").

If Access Is Not Received in 5 Business Days

- Follow up with the client using the correct channel per the **Client Communication Policy** — email for standard follow-up, phone if the delay is impacting the production timeline
 - Log the follow-up date in the 🔒 Access & Logins Tracker task comments
 - If still not received after 10 business days, escalate to the account manager — do NOT begin platform work without confirmed access
 - Adjust the production timeline if access delays push back the start of work — notify the client proactively per the communication policy
-

Access Recovery Protocol (Section 8B clients)

If the client's intake form Section 8B indicates a previous agency or developer holds access:

1. Identify all platforms needing recovery using Section 8B, Q4 of the intake form
 2. Flag each platform in the 🔒 Access & Logins Tracker with "Recovery Needed — [who controls it]"
 3. Contact the previous agency or developer on the client's behalf if the client has given permission
 4. Guide the client through the platform's official access recovery process (Meta Business Help Center, Google Ads account recovery, etc.)
 5. Do not begin work on any platform until access is fully recovered and confirmed
 6. Update the 🔒 Access & Logins Tracker once recovery is complete — remove the "Recovery Needed" flag and log the confirmed access date
