

Invoice & Billing SOP

Invoice & Billing SOP

Owner: Operations

Trigger: 1st of every month or per contract billing schedule

Key tools used in this SOP:

ClickUp — CRM Deals list,  Invoices & Payments list in Finance & Billing folder

Invoicing tool (*QuickBooks / FreshBooks / Wave / HoneyBook — confirm which tool is in use*)

 Email Templates — Template #14 Invoice Send, Template #15 Overdue Invoice Follow-Up

 Client Communication Policy — Part B for billing dispute escalation rules

Steps

1. Review Active Clients (by the 1st)

- Pull all active deals from ClickUp CRM with Billing status of Monthly or an upcoming installment (1 of 3 / 2 of 3 / 3 of 3)
- Confirm services delivered this month match what is being billed — cross-reference with the client's  Scope of Work Log in the Legal folder
- Flag any Change Orders approved this month — add additional fees to the invoice
- Flag any clients where services were paused or cancelled mid-month — adjust invoice accordingly

2. Generate Invoices (by the 2nd)

- Create an invoice for each active client in the invoicing tool
- Include: services rendered, billing period covered, itemized line items, total amount due, and payment due date
- Set payment terms per the client's contract: Net 15 or Net 30
- Apply any approved discounts or credits
- Reference the client's signed SOW for exact service names and rates — match them exactly on the invoice

3. Send & Log (by the 2nd)

- Send the invoice using **Email Template #14 — Invoice Send** — follow communication standards in **Client Communication Policy Part B**

- Never send invoices via the client portal — send directly to the billing contact confirmed in Section 1 of the intake form
- Log each invoice in the  Invoices & Payments list in the Finance & Billing folder in ClickUp:
 - Client name
 - Invoice number
 - Amount
 - Date sent
 - Due date
 - Status: Sent / Paid / Overdue
- Update the Billing field in the client's CRM Deal record to reflect the current billing cycle

4. Track Payments

- Update the  Invoices & Payments task to **Paid** as soon as payment is received
- Update the Billing field in the CRM Deal record when an installment is paid (*1 of 3 → 2 of 3, etc.*)
- Log the payment received date in the task comments

5. Follow Up on Overdue Invoices

- Day 1 overdue: Send **Email Template #15 — Overdue Invoice Follow-Up** — friendly tone, assume it was overlooked
- Day 7 overdue: Send a second follow-up — slightly more direct, ask for a payment date
- Day 15 overdue: Escalate to leadership immediately — do not handle billing disputes independently per **Client Communication Policy Part B**
- Leadership will determine whether to pause services, issue a final notice, or make other arrangements
- Flag all overdue invoices in the client's CRM Deal record Comments with the date and amount

Billing Rules

Rule	Standard
Invoice accuracy	Always cross-reference against the signed SOW before sending
Change Orders	Must be added to the invoice in the same month they were approved
Billing disputes	Never negotiate or make concessions without

	leadership approval
Paused services	Never continue billing for services that have been paused without leadership approval
Overdue threshold	Escalate to leadership at Day 15 — do not wait longer
Communication	All billing communication uses Email Templates #14 and #15 — not the client portal
