How to use this SOP: Every client gets the **Monthly Performance Report (Section A)** — it's the main report covering all active services. Clients on specific services additionally get the service-specific supplemental report for that service. Supplemental reports are delivered the same day as the main report — they go in the same task in the Reports & Analytics list as separate PDF attachments or additional sections.

SECTION A — MONTHLY PERFORMANCE REPORT

All Clients

Steps

1. Pull Performance Data (by the 3rd)

- Pull data from all active platforms: Meta Ads Manager, Google Ads, GA4, LinkedIn, TikTok
- Export key metrics: impressions, reach, clicks, CTR, conversions, ROAS, cost per result
- Pull organic social metrics: follower growth, engagement rate, top posts
- Pull SEO metrics if applicable: traffic, rankings, backlinks
- Cross-reference the client's KPIs from their intake form (Section 6, Q2) — benchmark every metric against agreed targets

2. Re-run Monthly Audits in the Hub (by the 3rd)

- Log in to the Hub at hub.revitalproductions.com using your @revitalproductions.com email
- Open the client's profile and re-run the **Social Media Audit** — compare this month vs. last month
- For SEO clients, update the **SEO Audit** progress
- For website clients, update the **UX/UI Audit** score if any changes were made this month
- Include Hub audit progress scores in the monthly report to show ongoing improvement

3. Build the Report (by the 4th)

- Open the **Monthly Report Template** in the Hub under the client's profile
- Complete all sections: Executive Summary, Platform Breakdown, Audit Progress from Hub, Top Wins, Areas for Improvement, Next Month Recommendations
- Reference the client's **Content Strategy Builder** KPI section to benchmark against agreed goals
- For paid media clients — include a Budget Recap showing total spend vs. budget
- Add supplemental service sections if applicable — reference Sections B through H below

4. Run QC Before Sending (by the 4th)

- Open the  **QC Checklist** doc in the SOPs & Internal Processes folder

- Run the **Universal QC Checklist** (Section 1) — check all data for accuracy, no placeholder text, correct client name
- Run the **Monthly Report QC Checklist** (Section 10) — verify all platform data, KPI benchmarks, and pre-delivery items
- Log QC completion in the report task comments before moving to delivery

5. Internal Review (by the 5th)

- Account manager reviews for accuracy
- Flag any significant drops in performance with a prepared talking point — do not let the client discover underperformance without context
- Confirm QC log is recorded in the report task comments

6. Download, Upload, and Link the Report (by the 5th)

- **Download** the completed report as a PDF from the Hub
- **Name the file:** [Client Name] — Monthly Report — [Month Year].pdf
- **Upload the PDF** to Google Drive — into  Monthly Reports / [Client Name] / [Month Year] inside the **Client Assets** shared drive
- **Set sharing** on the file to "**Anyone with the link**" — Viewer access
- **Copy the Drive link**
- **Create a task** in the client's  **Reports & Analytics** list in ClickUp:
 - Task Name: Monthly Report — [Month Year]
 - Report Month: set to the 1st of the covered month
 - Service(s): all services covered in this report
 - Completed Date: today's date
 - File / Download Link: paste the public Drive link
- **Test the link** before moving on — click it yourself to confirm it opens without requiring a login

7. Deliver to Client (by the 5th)

- Confirm the report task appears correctly in the client's portal shared view
- Send **Email Template #11 — Monthly Report Delivery** with portal link and highlights
- Schedule a report review call if included in the contract
- Do not send reports via email attachment only — always upload to the portal first

8. Update CRM

- Update Client Health rating in the CRM Deal record based on performance
 - If performance is down significantly → update Client Health to  Yellow and notify leadership
 - Log the report delivery date in the Deal record Comments
-
