

CRM Guidelines & SOPs

CRM Guidelines & Standard Operating Procedures

Revital Productions — Internal Use Only

This document outlines how to use the CRM space in ClickUp correctly and consistently. Every team member who manages clients, deals, or contacts must follow these guidelines.

Weekly Account Management Questionnaire

Complete this questionnaire **every Monday morning** for each active client. Log your answers in the Comments field of the client's Deal record, or in a weekly check-in task in their Delivery folder. This keeps the whole team aligned and surfaces issues before they become problems.

Who fills this out: The assigned Delivery Lead for each active account.

When: Every Monday before 10am.

Where to log it: In the Comments field of the client's Deal record in ClickUp CRM.

Section 1 — Client Relationship & Communication

- ☐ Did we have any communication with this client last week? (*email, call, meeting*)
 - ☐ Is the client responsive and engaged? ● Yes / ● Slow / ● Not responding
 - ☐ Are there any unresolved client questions or requests from last week?
 - ☐ Did the client submit any feedback or revision requests? If yes, have they been logged in the portal?
 - ☐ Is there anything the client said — formally or informally — that we need to act on?
-

Section 2 — Deliverables & Production

- ☐ Were all scheduled deliverables for last week completed and delivered on time?
- ☐ Are there any deliverables that are behind schedule? If yes, what is the reason and new ETA?
- ☐ Are all active tasks in the client's Delivery folder assigned to someone with a due date?
- ☐ Are there any revision rounds that have gone beyond the agreed scope?
- ☐ Is the content calendar up to date for the next 2 weeks?

Section 3 — Campaign & Results Check-in

- ☐ Are active campaigns running without technical issues? (*ads live, emails sending, posts going out*)
 - ☐ Did we review performance data from last week? (*ad spend, reach, conversions, traffic*)
 - ☐ Are results trending in the right direction compared to the client's objective?
 - ☐ Are there any budget pacing issues on paid campaigns? (*overspending or underspending*)
 - ☐ Do we need to make any optimizations or adjustments this week?
-

Section 4 — Client Health & Risk Assessment

- ☐ What is the current Client Health rating for this account?  Green /  Yellow /  Red
 - ☐ Has the Client Health changed from last week? If yes, why?
 - ☐ Are there any warning signs that this client may be at risk? (*slow replies, complaints, missed payments*)
 - ☐ Is the client seeing value in our work? Do they feel informed and supported?
 - ☐ Is there anything we could proactively do this week to strengthen the relationship?
-

Section 5 — Internal & Billing

- ☐ Is the Delivery Lead still the right person on this account, or does it need to be reassigned?
 - ☐ Is billing up to date? Has this month's invoice been sent and confirmed?
 - ☐ Is the Billing field in ClickUp CRM current? (*Monthly / 1 of 3 / 2 of 3 / 3 of 3*)
 - ☐ Are there any scope creep issues — work being done outside the contract?
 - ☐ Is there an upsell or expansion opportunity worth discussing with this client?
-

Section 6 — This Week's Priorities

List the **top 3 priorities** for this client this week:

- 1.
- 2.
- 3.

After completing this questionnaire, update the **Client Health** field and **Last Contacted Date** in the CRM if applicable. If any Red flags were identified, notify leadership the same day.

CRM Structure Overview

The CRM lives in the **CRM Space** and has three core lists:

List	Purpose
 Deals	Tracks every sales opportunity and active client relationship
 Contacts	Stores individual people — clients, vendors, stakeholders
 Companies	Stores company/brand records linked to contacts and deals

DEALS — How to Use

When to Create a Deal

Create a new Deal task the moment a prospect shows interest or a new service opportunity is identified. Do NOT wait until a contract is signed.

Deal Stages

Move every deal through these stages in order:

Stage	Color	What It Means
Opportunity	 Purple	Initial interest identified, proposal stage
Contract Sent	 Blue	Proposal or contract has been sent to prospect
Closed Won	 Green	Deal signed, client is active

Closed Lost	 Orange	Deal did not close — log the reason
-------------	--	-------------------------------------

Required Fields for Every Deal

Field	Type	Instructions
Deal Stage	Dropdown	Always keep this current — update immediately when stage changes
Revenue	Currency (USD)	Enter the total contract value when deal is created
Start Date	Date	Contract start date — set when Closed Won
End Date	Date	Contract end date or expected offboarding date
Closed Date	Date	Date the deal was won or lost
Onboarding Status	Dropdown	See Onboarding Status section below
Client Health	Dropdown	Green / Yellow / Red — update monthly
Billing	Dropdown	Monthly / 1 of 3 / 2 of 3 / 3 of 3
Delivery Lead	People	Tag the internal team member responsible
Objective	Short Text	One sentence — what is the client trying to achieve?
Contacts	Relationship	Link to the relevant Contact record(s)
Companies	Relationship	Link to the relevant Company record
Comments	Short Text	Any important notes — billing issues, special requests, flags

Onboarding Status Flow

Every active deal must have an Onboarding Status. Move it through these stages:

Status	Color	When to Use
Onboarding	 Blue	Client just signed — kick-off not yet complete
Active	 Green	Client is fully onboarded and work is in progress
Offboarding	 Red	Client has given notice or contract is ending
Inactive	 Yellow	Work paused or contract ended but relationship open

Client Health Ratings

Update Client Health every month or after any significant client interaction:

Rating	Color	What It Means	Action Required
Green	 Green	Happy client, no issues	Maintain momentum, look for upsell opportunities
Yellow	 Yellow	Minor concerns or slowing communication	Schedule a check-in call within 7 days
Red	 Red	At-risk client, serious issues	Escalate to leadership immediately

Inactive Reason (Closed Lost or Inactive Deals)

When a deal closes lost or a client goes inactive, always log the reason:

Reason	When to Use
Project Complete	Work finished, relationship positive
Poor Communication	Client unresponsive or relationship broke down
Results Didn't Meet Expectations	Client unhappy with performance
Budget Issues	Client pulled back due to budget constraints

CONTACTS — How to Use

When to Create a Contact

Create a Contact record for every individual person your team communicates with — clients, decision-makers, vendors, stakeholders, and team members at client companies.

Required Fields for Every Contact

Field	Type	Instructions
Name	Title	Full name — First Last
Email Address	Email	Primary email — use the Email Address field, not the Email text field
Phone Number	Short Text	Primary phone with area code
Job Title	Short Text	Their role at their company
Company Name	Short Text	Company they work for
Contact Role	Dropdown	See Contact Roles below
Last Contacted Date	Date	Update every time you have a meaningful interaction
Comments	Short Text	Any notes — preferences, flags, relationship context

Contact Roles

Role	Color	Who It's For
Client	 Pink	Primary client contacts and decision-makers
Manager	 Purple	Internal managers overseeing the account
Team Member	 Teal	Internal team members assigned to the account
Vendor	 Magenta	Third-party vendors,

		freelancers, or tools contacts
Stakeholder	 Lavender	Investors, executives, or secondary client contacts

Keeping Contacts Fresh

- Update **Last Contacted Date** every time you email, call, or meet with a contact
- If a contact has not been reached in 60+ days, flag it in Comments
- Duplicate contacts are not allowed — always search before creating

COMPANIES — How to Use

When to Create a Company

Create a Company record for every client brand or business you work with. One company per brand — do not create duplicates.

Linking Records

Always link Companies to their related Contacts and Deals:

- A **Deal** should have its Company linked via the Companies relationship field
- A **Contact** should have their Company Name filled in and be linked to the Deal

CRM ↔ Delivery Connection

When a Deal moves to **Closed Won**, the following must happen within 48 hours:

1.  Set Onboarding Status to **Onboarding**
2.  Create the client's folder in the **Delivery Space → Services**
3.  Duplicate the  **Client Portal Template v2** for the new client
4.  Tag the **Delivery Lead** on the Deal record
5.  Set **Start Date** and **End Date** on the Deal
6.  Log the **Objective** — what are they paying you to achieve?
7.  Update Onboarding Status to **Active** once kick-off is complete

Monthly CRM Hygiene Checklist

Run this checklist at the end of every month:

- ☐ Update **Client Health** on all active deals
- ☐ Update **Last Contacted Date** on all contacts touched this month
- ☐ Move any completed deals to **Closed Won** or **Inactive** with a reason logged
- ☐ Check for any deals stuck in **Opportunity** for 30+ days — follow up or close lost
- ☐ Verify all active deals have a **Delivery Lead** assigned
- ☐ Check for duplicate Contacts or Companies and merge if found
- ☐ Update **Billing** status on all active clients (Monthly / 1 of 3 / 2 of 3 / 3 of 3)

Common Mistakes to Avoid

Mistake	Why It's a Problem	What to Do Instead
Creating a deal after contract is signed	You lose visibility into your pipeline conversion	Create at Opportunity stage
Not updating Deal Stage	Pipeline reporting becomes inaccurate	Update same day as change
Leaving Client Health blank	At-risk clients get missed	Update every month
Sending emails without logging Last Contacted Date	No record of communication cadence	Update after every interaction
Duplicate contacts	Creates confusion and split history	Search before creating
Not linking Contacts to Deals	Records become disconnected	Always link on creation
Skipping the weekly questionnaire	Issues go unnoticed until it's too late	Complete every Monday before 10am
