

Revision & Feedback Process SOP

Revision & Feedback Process SOP

Owner: Delivery Lead

Trigger: Client submits a revision request

Key tools used in this SOP:

ClickUp —  Client Feedback & Revisions list, task comments, Feedback Form (*Business plan*)

Revital Hub — Content Strategy Builder

✓ QC Checklist doc — must be re-run after every revision before returning to client

|  Client Communication Policy — Part B for portal redirect scripts and escalation

Steps

1. Receive the Revision

- All revision requests must be submitted through the  Client Feedback & Revisions list in ClickUp — either via the **Submit Feedback or a Revision Request** form (*once Business plan is active — see Section A below*) or by creating a task directly
- If a client submits revisions via email or text, use the approved script from **Client Communication Policy Part B** to redirect them to the portal, then log the revision in ClickUp
- Never action a revision that was not submitted through the portal — this breaks the tracking system

2. Log the Revision

- Create or update the task in  Client Feedback & Revisions
- Tag the related deliverable task
- Update the Revision Round number on the deliverable task
- Set priority: Urgent / High / Normal / Low

3. Scope Check

- Check if the revision is within the contracted scope
- Reference the client's  Scope of Work Log in ClickUp Legal folder
- If it exceeds the agreed revision rounds or changes scope significantly, flag to the account manager before proceeding — a Change Order is required; reference the Change Order Process SOP in the Growth SOPs doc

4. Complete the Revision

- Assign the revision task to the correct team member with a due date
- Log in to the Hub at hub.revitalproductions.com using your @revitalproductions.com email
- Reference the client's **Content Strategy Builder** profile to ensure revised content still aligns with the approved strategy
- Complete the revision and move back to **Internal Review**
- **Re-run QC** — open the  QC Checklist doc and run the Universal Checklist plus the relevant service-specific section
- Log QC completion comment on the task before moving to Client Review
- Notify the client the revised version is ready — remind them of the 48-hour approval window per the **Client Communication Policy**

5. Final Approval

- Once approved, move to **Approved** → **Published**
- Log completion in the Comments field of the original deliverable task

 Maximum revision rounds are defined in the client's contract. Any request beyond the agreed rounds requires a signed Change Order before work begins.

 Every revised version must pass QC before being sent to the client — no exceptions.

SECTION A — CLIENT FEEDBACK FORM SPEC

Build this once ClickUp Business plan is active

Why this matters: A guided form structurally prevents vague feedback ("I don't like it") by requiring specific details upfront, and auto-creates a properly formatted task with all fields populated — eliminating manual data entry and inconsistent revision requests.

Form Name: **Submit Feedback or a Revision Request**

Where to Build It:  Client Feedback & Revisions list → Views → + Add View → Form

Form Fields

Field 1 — Your Name

Type: Short Text

Required:  Yes

Placeholder: **e.g. Sarah Johnson**

Field 2 — Which deliverable is this about?

Type: Dropdown *(or relationship field linking to existing tasks, if supported)*

Required: ☒ Yes

Helper text: Enter the name of the content or campaign exactly as it appeared in your Client Review email

Placeholder: e.g. May Week 2 — Instagram Reel — Mother’s Day

Field 3 — Service

Type: Dropdown — Single Select

Required: ☒ Yes

Options: *(reuse existing Service(s) field options)*

Organic Social
Paid Social
Paid Search
SEO
Email Marketing
Website Design
Inbound Marketing
Strategy

Field 4 — What needs to change?

Type: Long Text

Required: ☒ Yes

Helper text: Be as specific as possible — this helps us get it right on the first try

Placeholder:

Example: "Can we change the font color to our brand blue (#1A73E8)?"
Example: "The headline feels too formal — try something like 'Ready to grow your brand?'"
Example: "At 0:23 the text is too small on mobile — increase the font size"

Try to avoid: "I don't like it" or "change the copy" — the more specific, the faster we can act

Field 5 — Reference Image or Example *(optional)*

Type: File Upload

Required: ☐ No

Helper text: Got an example of what you're looking for? Attach it here — a picture is worth a thousand words

Field 6 — How urgent is this?

Type: Dropdown — Single Select

Required: ☒ Yes
Options:

- Urgent — needed within 24 hours
- High — needed within 2 business days
- Normal — standard revision timeline
- Low — no rush

Maps directly to the task Priority field — Urgent/High/Normal/Low.

Field 7 — Anything else we should know?

Type: Long Text
Required: ☒ No
Placeholder: Any additional context, deadlines, or notes

Form Settings

Setting	Value
Auto-create task	☒ Yes — task created in  Client Feedback & Revisions
Default Status on creation	Brief Received (acts as "Feedback Received" stage)
Map Priority field	From Field 6 — How urgent is this?
Map Service(s) field	From Field 3 — Service
Notify on submission	Account Manager — instant notification

Thank You Message

Got it — thank you!
Your feedback has been received and logged. Your account manager will review it and follow up within 1 business day. You can track the status of this request anytime in your portal under Feedback & Revisions.

Task Auto-Created From This Form

Task Name: Revision — [Deliverable Name] — [Date Submitted]

Status: Brief Received

Service(s): [from Field 3]

Priority: [from Field 6]

Description:

Submitted By: [Field 1]

Deliverable: [Field 2]

Feedback: [Field 4]

Reference Attached: [Field 5 if provided]

Urgency: [Field 6]

Additional Notes: [Field 7]

Once Built — Update These

Document	What to Change
Client Portal Doc	Replace "Submit a Revision Request" button URL with the Form share link instead of the raw list link
 Content Approval Workflow	Already references this form in Section 1 — confirm the link is added once built
 Custom Field Options Reference	Add a note under Section 13 documenting the form field mapping
